

## Supplemental Figure 1. Treatment of palbociclib resistant models with other CDK4/6 inhibitors

A-B. Relative cell viability of MCF-7 and MCF-7pR cells after being treated with indicated concentrations of Ribociclib and Abemaciclib for 48 hours was analyzed by cell viability assay. IC<sub>50</sub> of the indicated drugs in MCF-7 and MCF-7pR cells were shown. \*P < 0.05.
