29 **Figure S1. Immunofluorescence co-staining of Pan-CK (white), IL-1 α (green), and HIF-1 α**
 30 **(red) in HNSCC patient tumor sections, demonstrating co-localization (yellow) in hypoxic**
 31 **niches.**

32 (A) Representative fluorescent images of the HNSCC patient tumor sections. Nuclei were
 33 counterstained with DAPI (blue). Scale bars, 100 μm .

34 (B) *The co-localization statistical analysis of HIF-1 α and IL-1 α in Figure 1N and S1A.*

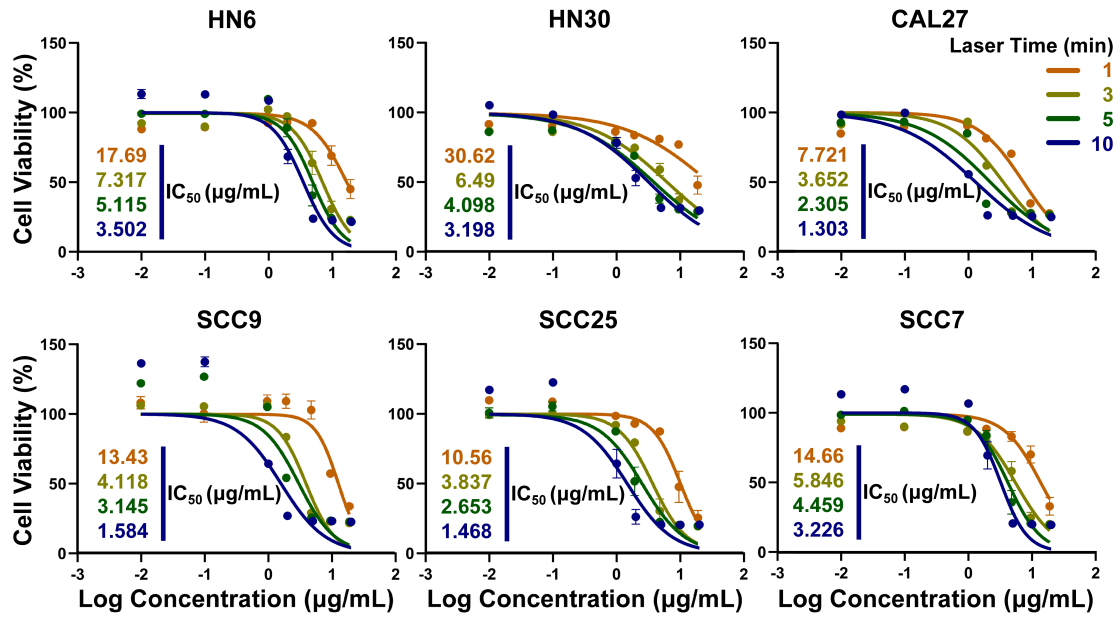

35

36 **Figure S2. Intracellular uptake of HMME in HNSCC cell lines.**

37 (A) Representative fluorescent images of HNSCC cell lines incubated with HMME for 0 min and
 38 3 h. Scale bars, 50 μm .

39 (B) Statistical analysis of mean fluorescent intensity indicated the quantification of (A), * $p<0.05$,
 40 ** $p<0.01$.

41

42 Figure S3. CKK8 assay detected HNSCC cell lines' viability and IC₅₀ under the
 43 HMME-mediated PDT at different concentrations and laser time.

44

45 Figure S4. Western blot of IL-1α levels in HN6 and SCC7 cells transfected with si-IL1A or
 46 scramble siRNA.

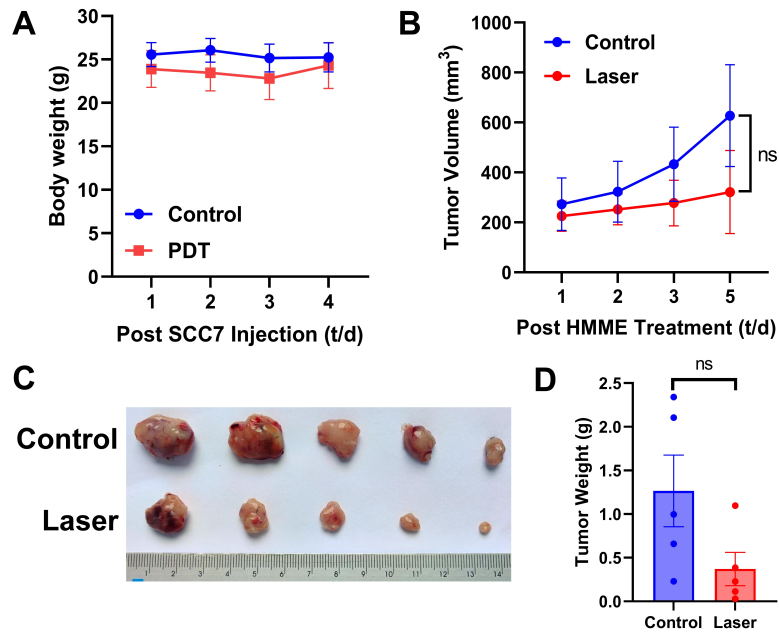

47

48 **Figure S5.** Representative images and statistical analysis of the mean fluorescent intensity of the
 49 ROS levels in HN6 and SCC7 cells under the indicated treatments.

50 **(A)** Representative images and statistical analysis of ROS mean fluorescence intensity in HN6 and
 51 SCC7 cells following HMME-PDT treatment, with pharmacological inhibition by IL-1RN
 52 and/or supplementation with recombinant IL-1 α . Scale bars, 100 μ m.

53 **(B)** Representative images and statistical analysis of ROS mean fluorescence intensity in HN6 and
 54 SCC7 cells following HMME-PDT treatment, with pharmacological inhibition by AF12198
 55 and/or supplementation with recombinant IL-1 α . Scale bars, 100 μ m. ** p <0.01, *** p <0.001,
 56 **** p <0.0001.

57

58 **Figure S6. The therapeutic effect of HMME-mediated PDT on C3He subcutaneous**
 59 **tumor-bearing mice.**

60 **(A)** Statistical quantification of body weight at the indicated days of the C3He xenograft models.

61 **(B)** Statistical quantification of tumor volume at the indicated days of the C3He xenograft models.

62 **(C)** Representative images of tumors in the C3He xenograft models with indicated treatments.

63 **(D)** Statistical quantification of tumor weight at the end of treatment. ns: no significance.

64

65 **Figure S7. Representative immunofluorescence images of p-NF-κB p65 location under the**
 66 **indicated treatments.**

67 **(A)** Representative immunofluorescence images and statistical analysis of the mean fluorescent
 68 intensity of p-NF-κB p65 location in HN6 cells treated with AF12198 and HMME-PDT. Scale
 69 bars, 20 μm.

70 **(B)** Representative immunofluorescence images and statistical analysis of the mean fluorescent
 71 intensity of p-NF-κB p65 location in si-*IL1A* HN6 cells treated with HMME-PDT. Scale bars,
 72 20 μm. **** $p < 0.0001$.
