The authors regret that a labeling error for the mouse age occurred in Figure 1B. During the labeling process of the figure, we inadvertently labeled the mouse as 3 months after injection, whereas the correct age should be 4.5 months old (2.5 months after injection). Accordingly, we have revised the figure legend of Figure 1B to reflect the correct age of 4.5 months. The corrected Figure 1B and the figure legend are provided, and all authors have agreed to this correction. This correction does not affect the original scientific findings or the conclusions of the study. We sincerely apologize for any inconvenience this error may have caused.

Correct figure legend of Figure 1B. Immunofluorescence (IF) staining of Cbfβ in knee joint from 4.5-month-old Cbfβ$^{f/f}$Aggrecan-CreER^{T} male mice induced by vehicle or TMX.
